DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11 and 21-25 drawn to an isolated DNA construct comprising at least one mutated binding site for a Gfi-1 transcription repressor, said mutated binding site comprising a mutation which hinders or prevents binding of said Gfi-1 repressor to said site and methods of use of said isolated DNA construct.

Group II, claim(s) 12-20, drawn to an expression regulatory segment.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. Each of the groups has a distinct technical feature not shared by the other group. The special technical features of each group are considered to be: **Group I-** a DNA construct comprising at least one mutated binding site for a Gfi-1 transcription repressor and **Group II-** an expression regulatory element comprising a tetranucleotide

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
